The Treasurer's Cash Account

The cash on hand, December 31, 1920, was verified by me by actual count, and the cash in the bank was verified by reconciliation of the outstanding checks with the book and bank statements, and was further verified by a letter received from the bank certifying to the amount to the credit of the town of Saugus at the close of the business, December 31, 1920.

Taxes Collected

The cash books and commitment books were footed and the payments to the Treasurer verified and compared with the receipts as recorded by him on his books.

Trust Funds

I have compared the savings bank books in the hands of the Treasurer with the amount called for in the Perpetual Care Fund account as being on deposit December 31, 1920, and the books and the amounts agree.

Ending December 31, 1920

The George Melvin Wilson Library Fund account was verified by examining the Liberty Bonds in the hands of the Treasurers, which are registered bonds, also the savings bank book.

Respectfully submitted,

GRANVILLE A. CLARK,

Town Accountant.

JANUARY 24, 1921.

HENRY A. PARKER,

Town Clerk.

Report of the Board of Selectmen

To the Citizens of the Town of Saugus:

The year 1920 has been one of great activity on the part of the Board of Selectmen, for the past year gave little evidence, if any, of solution to the problems of the post war period. There has been a continuation of high prices, making the cost of operation of the various departments correspondingly large.

Perhaps the outstanding feature of the past year was the execution of a five year contract with the City of Lynn for supplying the town with water, which now is purchased by meter. The execution of this contract was the result of an amicable adjustment of the water question with the City of Lynn and in our opinion the contract is fair and reasonable.

In as much as Saugus now purchases her water at meter rates it would seem advisable to sell the water to her inhabitants by metered service and this method is recommended. Moreover, until this method is adopted it will be difficult to ascertain the exact amount of water required for our citizens.

The pitometer survey, which was made, proved of value and showed the wisdom of the expenditure. Several large leaks were discovered and repaired. The result is a saving to the town in a very substantial amount.

The past year has shown a marked improvement in the highways. Probably in no other one year has there been as much activity along this line as in the year 1920. The Commonwealth of Massachusetts has reconstructed the Newburyport turnpike, three miles of which are in the town of Saugus. This has called for a very large expenditure on the part of the Commonwealth.

In addition to the Newburyport turnpike, part of Walnut street has been reconstructed and for this work we were able to persuade the Commonwealth and the county to make a contribution of \$10,000. Moreover, the Commonwealth, at the request of the Board of Selectmen has expended approximately \$2,500 on the detours through the town on account of the reconstruction of the Newburyport turnpike.

The bond issue, of \$30,000 in accordance with the statute, has been expended under the supervision of the state. Central street has been reconstructed, from the Boston & Maine railroad to a point 400 feet beyond Adams avenue.

This highway is the main thoroughfare between Saugus Center and Cliftondale and needed extensive reconstruction of a permanent character. This work has been expensive but demanded by the state. It ought to be completed, although the Board of Selectmen do not recommend another bond issue, but advise an appropriation which would permit of permanent construction, but not to the extent as required by the Commonwealth in the case of a bond issue.

In addition to the permanent work, the main arteries of travel have been treated with tarvia and pea stone, and it is the general opinion that a creditable showing has been made. The appropriation did not permit of much improvement on the side streets and this work ought not be postponed any longer, as many of them are in urgent need of repair.

The appropriation of \$500 for sidewalks is manifestly inadequate for the very apparent need in this regard and ought to be substantially increased the coming year.

The success of the Public Works Department and the amount of work performed has been very largely due to the creditable manner in which Superintendent, Peter Haigh, has performed his labors. He has been careful, painstaking and always has exercised a rare good sense which has commended him to all our fellow-citizens.

Respectfully submitted,

WALTER SPRAGUE,
FRANCIS M. HILL,
JOHN G. HOLMES,

Board of Selectmen.

Report of Chief of Police

To the Honorable Board of Selectmen:

GENTLEMEN,—In accordance with the requirement of the Town Ordinance I have the honor to submit my twenty-fifth annual report of the police Department for the year ending December 31, 1920.

Chief of Police

Charles O. Thompson.

Patrolmen

Captain Roland L. Mansfield, Frank W. Joy, James P. Sullivan, Herbert C. Berrett, John T. Stuart, Clifford E. Robie.

Special Police

Peter A. Flaherty, William M. Penney, Timothy J. Bannon, Frank M. Symonds, Carl F. Koch, Howard P. McAdoo, William H. Semons, Walter W. Hanson, Justin E. Mansfield, Thomas E. Berrett, George W. Parker, Henry N. Williams, Christopher C. Merrithew, Thomas E. Sutherst, W. Charles Sellick, Daniel B. Willis, Harvey Upham, Frank Whitford, John H. Newhall, Charles E. Light, Charles E. Stillings, Andrew C. Lynn, George W. Atkinson, Millard H. Tufts, Daniel W. Meade, Lamburton D. Batchelder, Charles N. Wormsted.

Arrests

Total number of arrests for the year 1920 was 164 of which 158 were males and 6 females.

The following are the offences: Assault, 15; arrested for out of town officers, 2; breaking and entering, 11; cruelty to animals, 4; drunks, 13; disturbing peace, 1; disorderly conduct, 1; default, 2; dogs not licensed, 9; defacing buildings, 3; gaming on Lord's Day, 2; illegal transportation of liquor, 1; illegal keeping liquor, 4; indecent exposure, 1; larceny, 17; manslaughter, 1; non-support, 2; neglected children, 5; attempt

rape, 1 ; receiving stolen property, 1 ; stubborn children, 7 ; threat, 1 ; trespass, 9 ; vagrant, 1 ; violation Town By-Laws, 8 ; violation School Laws, 5 ; violation Auto Laws, 34.

Disposition of Cases

Fined, 65 ; filed, 58 ; discharged, 16 ; defaulted, 3 ; released, 6 ; committed to Salem, 5 ; committed to State Board of Charity, 5 ; committed to Danvers Hospital, 4 ; committed to Lancaster Training School, 2 ; held for Superior Court, 2 ; appealed, 2.

Miscellaneous

Complaints received and investigated, 682 ; disturbances suppressed, 52 ; doors found open and secured, 81 ; lights furnished for dangerous places, 23 ; lost children found, 6 ; windows found open, 21 ; lights left burning, 31 ; lost dogs restored to owners, 5 ; stolen automobiles recovered and returned to owners, 2 ; dogs killed, 45 ; Hospital calls received and parties notified from Boston, 9 ; from Lynn, 6 ; automobile accidents reported and investigated, 16.

Keeper of Lockup

There were 37 prisoners locked up during the year ; cost of keeper, \$102.25 ; meals for prisoners, \$7.45 ; total expenses of lockup, \$109.70.

Patrol Wagon

The patrol wagon has answered 61 calls, and the light automobile has answered 127 calls.

Recommendations

I would recommend that the sum of \$15,000.00 be appropriated for the year 1920.

Conclusion

In submitting my report, I wish to thank the Honorable Board of Selectmen for the support given me ; also Judge William E. Ludden and others who have assisted me in the performance of my duties ; I also desire to tender to the officers both regular and special my appreciation for their loyal co-operation.

Respectfully submitted,

CHARLES O. THOMPSON,

Chief of Police.

Report of the Board of Fire Engineers

To the Citizens of the Town of Saugus:

The record of the Fire Department, for the year 1920, has been one of achievement. The department has merited and received the commendation of our citizens.

Economy and efficiency has been the watchword and a serious and successful effort has been made toward a satisfactory performance of the duties assigned.

During the past year needed and important improvements have been made. One permanent man has been added to the department. A new Seagrave combination auto chemical and hose has been purchased. These additions to the department will increase its efficiency in a marked degree.

By careful financial management there was returned to the town treasury \$1,258 of the annual appropriation. We believe this record to be without precedent in town affairs. This result is especially gratifying in view of the fact that the effectiveness of the department has not been impaired.

There have been 51 bell alarms and 87 still alarms during 1920.

Because of the efficient and prompt work of the members of the department the fire loss did not exceed \$7,000.

The new Seagrave combination auto chemical and hose was purchased with a view of adding a pump thereto and this addition is recommended.

The present quarters occupied by the permanent firemen, are entirely inadequate. It is recommended that a new central fire station be provided which, with another permanent man would place the department on a first-class basis of operation.

The Board of Engineers appointed Edward J. McTague Chief of the Department. Inasmuch as he was a permanent fireman it was believed that this was a move in the right direction. Experience has proven the wisdom of the selection.

EDWARD J. MCTAGUE,
JOHN G. HOLMES,
WALTER SPRAGUE,
FRANCIS M. HILL,

Board of Fire Engineers.

Report of Overseers of the Poor

Charities Department

To the Citizens of the Town of Saugus:

Your Board of Overseers herewith submits its annual report for the year ending December 31, 1920.

Of our appropriation of \$9,869.00 we have spent \$9,794.65, leaving an unexpended balance of \$74.35, which reverts to the town treasury; there are unpaid bills yet to be received which will amount to approximately \$500.00 making the total expense of this department \$10,294.65 for the year 1920.

We have received from cities, towns and individuals the sum of \$763.42 and from the Commonwealth of Massachusetts, \$2,710.87, making our total receipts \$3,474.29 and the net expense of maintaining the Poor Department, \$6,320.36.

Our payroll for mothers with dependent children amounts to approximately \$150.00 per week.

We recommend that the sum of \$14,000.00 be appropriated for the year 1921.

Saugus Home

We have received on account of the home, from all sources, the sum of \$13,583.53 and have spent \$12,485.72, leaving an unexpended balance of \$14.48 from our appropriation of \$12,500.00 which reverts back to the town treasury; there are unpaid bills amounting to \$1,363.49, making a total expense of \$13,849.21 for the year, which shows a total net expense to the town for the maintenance of the home of \$265.68, which we consider an excellent showing when we take into consideration the high cost of labor and supplies.

The home shows the usual good management and the inmates are well cared for.

We recommend that the sum of \$14,000.00 be appropriated for the year 1921.

Respectfully submitted,

GEORGE H. AMES, *Chairman.*

ANTHONY HATCH,

EVAN EVANS,

Overseers of the Poor of Saugus.

J. E. MANSFIELD,

Janitor.

Report of Tree Warden

To the Citizens of the Town of Saugus:

I herewith submit to you my annual report for the year ending December 31, 1920.

I have removed a number of dead trees in different parts of the town and a number of dead limbs, and trimmed a number of trees in all parts of the town. I should recommend the sum of three hundred dollars for the care of town trees for the coming year.

Respectfully submitted,

T. E. BERRETT,

Tree Warden.

Report of Forest Fire Warden

To the Honorable Board of Selectmen:

I submit to you the following report from January 1, 1920, to December 31, 1920.

I have taken care of twelve forest fires and answered several calls from the State Forest Fire Warden. I would recommend the sum of one hundred dollars for the coming year.

Respectfully submitted,

T. E. BERRETT,

Forest Fire Warden.

Report of Board of Health

SAUGUS, MASS, January 1, 1921

The board herewith submits the following report for the year 1920. Organization as follows: Chairman, Charles E. Light; Secretary, Tom D. Emmett; Department Physician, George W. Gale, M. D.

Meeting

Regular meetings of the board are held at the Town Hall on the first Monday of each month at eight o'clock P. M., third floor.

Appointed

Plumbing Inspector, Thomas C. Sutherst; Inspector of Milk and Cattle, Arthur W. Sawyer, V. S.; Burial Agent, Henry A. Parker.

Departmental Work

Complaints of drainage and other nuisances have been unusually numerous this year; all have received attention, 26 notices having been sent out but the greater number have been attended to in person by the Inspector. Fifteen Infants' Boarding House licenses have been approved.

Collection of Ashes and Garbage

Contract awarded to John J. Skahan for \$265 per month.

Health and Sanitation

The expense of all patients committed to hospital care from Saugus, by the board, must be paid from this appropriation; in the case of the patient having a settlement in another town or city, Saugus receives from such other town or city, reimbursement of the amount expended; if the patient has no settlement in any town or city, the State reimburses the town but Saugus must bear the cost when the patient has a settlement here.

Communicable Diseases

Anterior-Poliomyelitis—One case reported.

Broncho-pneumonia—Eight cases reported.

Lobar-pneumonia—Six cases reported, one resulting in death.

Chicken-pox—Eighteen cases reported.

Combination of broncho-pneumonia and influenza—Eight cases reported, two resulting in death.

Combination of lobar-pneumonia and influenza—One case reported resulting in death.

Diphtheria—Eleven cases reported, one resulting in death.

Erysipelas—One case reported.

German measles— One case reported.

Influenza.— Two hundred and sixty cases reported, six resulting in death.

Measles— Seventeen cases reported.

Mumps— Three cases reported.

Scabies— One case reported.

Scarlet-fever— Fifty-six cases reported.

Septic sore throat— Nine cases reported.

Suppurative conjunctivitis— Four cases reported.

Tuberculosis, all forms—Twelve cases reported, three resulting in death.

Typhoid fever—Three cases reported, one resulting in death.

Whooping-cough— Twenty-eight cases reported.

Financial

The appropriation of \$2,779.66 for the year 1920 has been spent as follows: For tuberculosis patients, \$898.89; for Contagious Hospital cases, \$57.86; and the balance of \$1,067.31 was spent for the running expenses of the department, leaving an unexpended balance of \$761.60 which reverts to the town treasury. We have received \$587.29 reimbursements and there was due December 1, from the state the sum of \$319.27 on subsidies. For other details on financial report see Town Accountant's report.

In spite of the growing population and increase of all costs, this department has been run at a less cost each year as the following table will show:

Year	Cost of Maintenance
1920	\$2,100 00
1919	2,168 00
1918	2,380 00
1917	2,396 00

We feel that this is due to the presence of a health officer in town all the time.

Dairies

This is a very important part of the department's work and one through which disease often gets a start, and the State Department expects the local board to keep all such places under strict observation; therefore, we are asking for a special appropriation for this work, our dairy inspector having been unable to give as much attention to this work as should have been given, on account of the lack of an appropriation for the same.

Respectfully submitted,

CHARLES E. LIGHT, *Chairman.*

TOM D. EMMETT, *Secretary.*

GEORGE W. GALE, *Department Physician.*

Board of Health of the Town of Saugus

Report of Inspector of Plumbing

SAUGUS, MASS., December, 31, 1920.

To the Board of Health, Saugus, Mass.:

GENTLEMEN,—In accordance with the requirements of Chapter 103 of the Revised Laws of Massachusetts, of the supervision of plumbing, I hereby submit my report for the year ending December 31, 1920.

The number of inspections made during the year, together with other inspections, will be found in table herewith annexed:

Total number of inspections	240
Permits issued	80
Permits refused	1
Complaints of violation of ordinance investigated	1
Cesspools inspected	82

Respectfully submitted,

THOMAS C. SUTHERST,

Plumbing Inspector.

Report of Cattle and Milk Inspector.*To the Board of Health:*

GENTLEMEN,—I have inspected the following slaughtered animals:

Beeves.	9
Hogs	204

In making the annual inspection I examined

Cattle	640
Hogs	375

One cow was quarantined, and later disposed of by order of the state.

I have issued 69 milk licenses.

Respectfully,

A. W. SAWYER.

Report of the Library Trustees

To the Citizens of the Town of Saugus :

During the past year the Library has continued to grow. The circulation at the main building has increased by about one thousand and the branches are giving out books in ever increasing numbers.

A new branch opened in North Saugus has hardly justified its existence so far, but it is hoped that its popularity will grow during the coming year.

Mrs. Laura Taylor, who has been librarian since March is keeping up the work of cataloguing, and has rebound a large number of worn volumes; thus saving the library considerable expense.

The telephone in the library should prove a boon to patrons. Last winter there was considerable flooding in the basement and to save the building the Trustees had a pump installed and this has proved satisfactory.

The circulation during the year for the main library and various branches was as follows :

Main Library	.	.	.	18,478
Cliftdale	.	.	.	8,866
East Saugus	.	.	.	6,029
Lynnhurst	.	.	.	925
North Saugus	.	.	.	295 (from August 17 1920.)

Respectfully submitted,

RUSSELL B. KENNEDY, *Chairman.*
 JOHN HUSTLER, JR.,
 JOHN B. LANG,
 CHARLES WILSON,
 VERNON W. EVANS.
 SANFORD FULL,

Trustees.

Report of the Cemetery Department

We feel proud of the showing at the Riverside Cemetery for the year 1920. With the many problems still facing us, we have succeeded in developing 45 lots in the Winter street section, near the wall, which have a selling value of \$3,020 net. These lots vary in size from 200 to 400 square feet.

One hundred eight thousand square feet of the south side of the meadow in the centre of the cemetery has been rough graded, needing only loam for finishing. It is the purpose of the Commissioners to develop a large piece on the river bank for small lots of 100 square feet or less, thus connecting the two parts of the cemetery that have until this year been divided by undeveloped land on the north and south.

There is a crying need for cement gutters and more shade trees which we will ask you to allow this year. In view of the fact that the Cemetery appropriation has not affected your taxes for the last twelve years, except to lower them, we feel that you will grant an appropriation sufficient to make the necessary improvements.

The new land recently purchased has nearly paid for itself in sods and loam, leaving a great opportunity for laying out new lots in the near future.

BENJAMIN F. FULLERTON,

Chairman.

Report of Notrh Saugus Schoolhouse Building Committee

To the Citizens of the Town of Saugus:

The North Saugus Building Committee, consisting of Mr. John G. Holmes, Mr. Henry Westendarp, Mr. Arthur Hawkes, Mr. John Fisher and Dr. Ernest W. Homan met and organized with Dr. Homan as Chairman, and John Fisher as Secretary.

Mr. Charles V. Burgess was at once chosen as Architect, and the plans and specifications presented at the Town Meeting were adopted. When the bids were received they were found to be in excess of \$25,000, the amount of the appropriation. After revising the specifications an addenda was sent out and the bids for general contract and heating contract amounted to \$24,944.

In view of the emergency that exists at this School the Committee felt justified in going ahead with the work.

The cellar was dug and a fine cement wall built. The old building was lifted up and then moved onto the new cellar and the two room addition was built on with four toilets, teachers room, corridors, and all according to the plan accepted by State Building Department. As only three rooms are being used the committee felt that for the present one room could be left unfinished, and from present indications it will not be needed for some years. The toilets being on the same floor as the rooms and the children not having to go to the basement, the committee did not think it necessary to spend \$300 in concreting the cellar floor. The committee asked of the town \$5,000 to pay the architect's fee and to buy new furniture, and finish the work on the school, but as this was refused, the committee did the next best thing and finished the building up so that it could be occupied on January 3, 1921. And the three rooms being used are very satisfactory. There were various items that had to be left out, such as the portico over the front door, the new plaster on walls of old rooms, new black boards, etc. But after all has

been said the committee feel that they got a lot for the money expended. We are not asking for more money. The scholars are in the building. They have good light, good heat, modern ventilation, modern toilets, and the essential things have been taken care of. One visiting official said that for a remodeling job it was the best lay out he had seen. Our only bills remaining unpaid are the architect's fee of \$1,250, and a very small balance of about \$4 on the heating contrac.

(Signed) DR. E. W. HOMAN, *Chairman*.
JOHN G. HOLMES,
JOHN A. FISHER,
HENRY O. WESTENDARP,
ARTHUR L. HAWKES.

ANNUAL REPORT
OF THE
SCHOOL COMMITTEE
AND
Superintendent of Schools
OF THE
TOWN OF SAUGUS

FOR THE YEAR ENDING DECEMBER 31, 1920

LYNN, MASS.
FRANK S. WHITTEN, PRINTER
1921

Report of School Committee

To the Citizens of the Town of Saugus:

The School Committee submit their annual report which combined with that of the Superintendent and Principal of the High School will give you some idea of the work of the School Department.

The Committee feel that the Schools are running very smoothly, and wish to give Superintendent Lambert credit for securing and maintaining such a splendid corps of teachers.

Your Committee would like to commend Mrs. Norris for the very efficient manner in which she has conducted our High School. For so large a school the discipline is excellent, and now special attention is being paid to raising the standard of Scholarship. Visiting educators have only words of praise for our High School.

Your Committee have endeavored to eliminate non essentials and things that would detract from the best efforts of both scholars and teachers.

The constantly increasing number of pupils in our town, keep our housing problem ever before your Committee.

The North Saugus Schoolhouse having been remodelled, was opened on January 3, 1921. Three rooms being occupied, and one left unfinished for future growth. The building has a modern heating and ventilating system as well as up-to-date toilets etc. The location and arrangements of rooms add much to the general lighting effects.

The next problem in housing will come in the Cliftdale section of the town and has been referred to a special committee to report with recommendations.

Your School Committee feel that as West Cliftdale is the growing section of that part of the town, a six-room building here would relieve the congestion in the center of Cliftdale.

Repairs

Our school buildings are in very fair condition. The addition to the stack at the High School at the cost of \$844 solves a

problem of long standing very satisfactorily. The janitor is now able to burn part screenings at a considerable saving to the town due to the increased draft. The heating arrangements at the High School have been partly solved and will be completed this year undoubtedly. This situation is more fully explained in the report of Mr. Gibson our engineer which is attached hereto.

The Clifftondale School has to have its heating apparatus overhauled.

The Mansfield School has to have its roof shingled and ought to be painted as well as one or two of the other schools.

Drainage

The cesspools of the High and Lynnhurst School have given much trouble this last year and have been fixed, so that no further trouble is looked for from this source.

Fuel

Your Committee could not get any one to bid on coal, so Mr. C. H. Stocker has furnished our coal at market price, this means that we have had to pay \$15 or \$16 a ton for coal. We feel that some one person or board should have the given authority to purchase coal for all departments of the town, and make a considerable saving.

Transportation

With the discontinuing of the Eastern Massachusetts car lines in our town our problems along this line have increased. Our supervisors are handicapped about visiting rural schools and the expense has increased to the point where we have to allow each supervisor a certain amount for travelling expense. The North Saugus teachers have to be transported to the school every day.

Tuition

It will be noticed that this amount is constantly increasing. People build their homes on the very outskirts of the town, with the result that their children are more than the legal distance from our schools, while they may be within sight almost of a school in Melrose or Wakefield.

It seems to be the best solution to pay their tuition rather than try to transport them to our schools, in some cases two or three miles away.

The State pays tuition for all State wards in town schools, but there are a great number of children who are boarded in town whose parents reside elsewhere from whom we should receive tuition, but the committee have thus far been unable to make any notable progress in collecting same.

Clerk

Miss Edith Pillings who has served as clerk in the school office part time for several years, having accepted a position in the Water Department which prevents her continuing with the School Department. The committee felt that in view of the increased amount of reports, statistic, etc., required of our department by the State and in view of the routine work involved in caring for a department as large as that of the schools that a full time clerk was necessary. Miss Helen Graves has been engaged as clerk for the School Department.

Physical Instruction and Athletics

For a long time the committee has felt that more attention should be given the physical life of the scholars, especially those of the junior high age. We have been paying \$150 for baseball, and \$150 for football, but only a few of the larger and stronger boys get any benefit from this training. The committee had an opportunity to have Mr. Beresford the athletic coach for part time each week in physical culture from now until June and he is now at work in the school on part time. This we hope will result in improved physical condition and will also help in getting the team into shape.

We feel that more athletic team work in a school the size of ours cannot but help to keep boys at school.

The committee have asked for a sufficient amount under this head to care also for the rent of the athletic field. This has been left for the principal of the school to do and the committee feel that this should be taken care of by the town and not left to the principal and scholars to raise this money by tag days, etc.

If athletics are worth having in our school, and we all agree in that, then let us not make the boys pay for their place to play.

Dental Clinic

The teachers, with the chairman of the Junior Red Cross, have been very desirous for two things which would help greatly the health conditions of the school children. It was decided to

bend their efforts for a dental clinic; some favored a school nurse, but at that time it was not advised that Junior Red Cross money be used for that purpose, perhaps on account of the greater expense.

Having received help besides our membership from the Lynn Chapter, Tuberculosis Fund, and two private donations, there is sufficient money to start the work when the best plan is arrived at, from the study of what other towns are doing, that will best suit Saugus conditions.

The school nurse is of equal importance for child welfare.

The co-operation of district nurse, school nurse and dental clinic is under consideration. In order to do this work successfully some aid will have to be given. We, therefore, ask the voters to help finance this splendid plan which will help the child that doctors are never asked to attend, thus making all children safer and healthier.

Respectfully submitted,

ANNA C. PARKER,

Chairman.

In Conclusion

We realize our large tax rate, and what a proportion of it goes to our schools, but we feel that ours has not been increased out of proportion with other cities and towns around us, and we feel very strongly that we cannot afford to stint or handicap the boys and girls of to-day, who are to be the men and women of to-morrow.

We believe that there should be a secretary of education and federalize the control of schools just as much and more so than a secretary of agriculture.

When we have federal control and uniform laws then we may get some relief. We appreciate very much the spirit of co-operation shown by the people of the town, and a willingness to do for the boys and girls just as much as the town can afford.

(Signed)

DR. ERNEST W. HOMAN, *Chairman.*

LAWRENCE E. MORSE,

ANNA C. PARKER,

HAROLD E. DODGE,

H. O. WESTENDARP.

Report of Saugus High School Heating System

*To the School Committee and the Superintendent of Schools,
Town of Saugus:*

In June, 1920, the heating system of the High School was supplied by the following units:

Six hot air furnaces, one sectional steam heater and two horizontal tubular steam boilers making a total of nine heating units.

The six hot air furnaces supplied heat to six rooms and the assembly room in the original building. The sectional steam heater supplied the corridors and office and the two horizontal tubular boilers supplied 109,352 cubic feet in the addition.

After consulting with several heating contractors the School Committee decided that the school would be heated more economically if the hot air furnaces were removed and the entire building put on a steam heating system. The committee's decision was influenced by the following facts:

1st. The two horizontal steam boilers were sufficiently large to heat the entire building.

2nd. It was more expensive to run nine fires than to run three.

3rd. Steam heat is considered to be at least 20 per cent. more efficient than hot air.

4th. The anthracite coal burned in the hot air furnaces is much higher priced than the bituminous coal which is used in the steam boilers.

Realizing that the initial expense would be large the committee decided to rearrange only four rooms for 1920, the heating systems of the other rooms to be changed when the money could be appropriated.

Accordingly two of the hot air furnaces were removed and reinstalled in the Mansfield School at East Saugus.

The committee then authorized me to make a survey of the proposition and draw up plans for a rearrangement of the heating system.

The plans as drawn and approved by the inspection of the State Department of Public Safety call for a system of indirect steam heating, the supply to be taken from the two horizontal steam boilers. No change is being considered for the heating of the corridors and office.

The committee accepted the plans and requested bids on the work as shown for the four rooms which then had no heat supply.

Bids were received and opened. They ranged from \$3,220 to \$2,600, Mr. James Hogan of Cliftondale being the lowest bidder. The committee had available only \$700. Acting on advice of the town counsel, the contract was not let.

Knowing that the four rooms must be heated before cold weather, the committee authorized Mr. Hogan to install \$700 worth of the new arrangement.

At the Special Town Meeting in November the committee asked for an appropriation to complete the installation. The appropriation was not granted.

At the final meeting (for the year 1920) of the Finance Committee, three hundred dollars (\$300) were placed at the disposal of the School Committee for heating.

Mr. Hogan was then directed to install the radiation necessary to heat two of the four rooms.

The committee now requires \$1,600 to complete the new heating system for the four rooms.

In the interests of economy the remaining hot air furnaces should be removed and the system of indirect steam heating installed.

The estimated cost to remove the four hot air furnaces and install the steam heating system is \$3,000. The system has been arranged so that two of the furnaces could be removed this year and two next year if desired.

Respectfully,

H. W. GIBSON,

Special Heating Engineer

Report of Superintendent

To the School Committee and Citizens of Saugus:

It becomes the duty and privilege of your Superintendent to submit at this time, his third annual report of the condition, progress and needs of the schools of Saugus, the same being the twenty-eighth annual school report.

The Teaching Force

As you will doubtless agree, the largest single factor having to do with the accomplishments of any school system is the efficiency of its teaching force.

We have done our best to keep fully up to the mark in this respect and the nature of the work now being done in the school-rooms seems to indicate more than a fair degree of success.

The following table shows the changes in our corps of teachers for the period between September, 1919 and September, 1920, the first column containing the names of those teachers who are no longer with us, the second, the names of our new teachers:

Changes in Teaching Force

September, 1919 to September, 1920

RESIGNED	NEW TEACHERS
Senior High	Senior High

Given Leave of Absence—Nellie K. Bishop, Mrs. Florence Martin.

Transferred—Evelyn Stevens from Ballard to Junior High.

Mrs. Elsie Foster, from Ballard to Felton.

Margaret Cameron, from Oaklandvale to Junior High.

Katherine Falvey, from Junior High to Supervision of Penmanship.

Additional Teaching Positions and Teachers—East Saugus Junior High—Harry Johnson, Principal; M. Eckless Ney, Esther Lane.

Supervisors—Katherine Falvey, Penmanship; Laura Cram, Music; Josephine Malone, Drawing.

Of the twenty-five teachers listed as resigned, eight resigned to be married, one because of illness, one to prepare for the ministry and fifteen to accept better positions.

Of our present corps of teachers, now numbering eighty members, only twenty-three were with us three years ago and only fifty-three previous to September, last.

These facts give some idea of that constant changing of teachers that constitutes, in most cases, a distinct injustice to pupils and a decided drawback in the general progress of educational interests.

As you know, a teacher in a Massachusetts town is placed under tenure after three years service in that town. According to our records, we now have fifty-seven teachers not yet under tenure. How many of these would we like to retain for three years or more? Judging from the past, how many of the successful ones shall we be able to retain?

We are optimists, not pessimists, but if we allow our optimism to lull us into a false sense of security, we shall be making a wrong use of a very excellent human characteristic.

Every reasonable effort should be made to retain our best teachers. We should not be deceived by the report that teachers are coming back, for, if such a report be true, we need look for no surplus of efficient teachers within a period of several years at least. The Normal Schools are not meeting the demand.

Two articles from a sheet published by the Bureau of Education, Washington, are so pertinent to this subject that we submit them below and ask your careful consideration of the same.

Questions for Teachers to Ask and Communities to Answer.

Practically every teacher must necessarily think about salary as the prime factor in compensation for his services. This obtains as a matter purely of self-preservation. The best teachers, however, attach a great deal more weight to other attractions toward service in a particular place, than compensation.

These teachers are inclined to ask such questions as the following:

1. What opportunity for whole-hearted service does this position offer me?

Support of Superintendent and Parents.

2. Will the superintendent and school committee support my efforts to do vigorous and efficient work?

3. Will the parents of the community give me honest, whole-hearted support and co-operation?

4. May I expect to be invited to and welcomed in all the homes in the community?

5. Will my working conditions be adequate and attractive?

6. Will the social life of the community be open to me that I may associate with the brightest minds and the best characters therein?

Are Answers Satisfactory in Your Community?

Because satisfactory answers like these can so seldom be given is one of the reasons why it will be difficult to find for the coming year a sufficient supply of teachers.

Why not set forces to work that will tend toward making your community one in which the right kind of answers can be given to pertinent questions a prospective teacher might ask?

See to it that your school committee, chamber of commerce, grange, and clubs realize their duties in this regard.—*Connecticut Schools.*

Teacher Shortage Remedies

So organize your work and crystallize public opinion in your town that to the successful teacher are offered:

1. Attractive working conditions.
2. Genuine hospitality.
3. Social advantages which her position warrants.
4. Association with the brightest minds and finest characters.
5. A salary which will attract and retain.
6. A salary which places a premium on efficient service.
7. A salary which provides for advancement in such manner as to emphasize improvement or growth in service.

As a matter of wise public policy the best teachers should be held in the professions and the most capable men and women should be induced to take up teaching as a career.

How can this be done?

There is but one answer to this question, and that is by making the salaries, the living conditions and the working conditions of our school teachers as inviting as the salaries, living conditions and working conditions in other vocations and professions.

In the end, so-called economy in teachers will bring far more disastrous results to the public than to the teachers themselves.

—*Connecticut Schools.*

Can we compete successfully with other towns? The answer is found in the following table:

Salary Schedules in Effect October, 1920

Places	Principal	SENIOR HIGH SCHOOL		Reg. T. Women		Membership	GRADES I-VI

School Attendance

Daily attendance throughout the town has been good but not good enough. Our attendance officer has been kept busy for a comparatively large portion of his time, endeavoring to protect a small number of children from evils resulting from the tendency of their parents to place their own convenience, comfort and pleasure above the welfare of their offspring. Are we too lenient in such cases?

Would not a more radical policy, resulting in a fine or two or a few jail sentences, give better results?

The cause of education should be pushed in every legitimate way. We must finish what our soldier boys began; and, if we are to be counted worthy as they are, if we are to do our duty as they did, then, as school officials, we must take whatever measures are most effective to prevent any desertions from our little division of that "army behind the guns"—the public school.

Your attention is respectfully called to the attendance officers' report.

Does Education Pay?

Under this heading your superintendent can do no better than to call your attention to the following article which appeared recently in the Wisconsin Educational News Bulletin.

Education Is the Nation's Bulwark

Because—

1. It is a financial investment that yields the highest dividends.
2. It results in safe and sane citizenship.
3. It increases the ability and desire to serve others.
4. It adds to the appreciation and happiness of life.
5. It multiplies the chances of success in life.

Education Fits for Service

With no schooling the child has only one chance in 150,000 of rendering distinguished service.

With elementary schooling the child has four times the chance of the one without it.

With high school education he has 87 times the chance.

With a college education he has 800 times the chance.

Fewer than one per cent. of Americans are college graduates, yet that one per cent. has furnished:—

Fifty-five per cent. of our Presidents.

Fifty-four per cent. of our Vice Presidents.

Forty-seven per cent. of our Speakers of the House.

Thirty-six per cent. of our members of Congress.

Sixty-one per cent. of our Secretaries of State.

Sixty-seven per cent. of our Attorneys-General.

Sixty-nine per cent. of our judges of the Supreme Court.

Physical Training.

This work has just begun, consequently the progress is not, as yet, sufficient to form a basis upon which to report.

We have no doubt, however, but that this is an important step in advance and that results will fully justify a much greater expenditure than is now being made.

To make such training effective, it should be begun in the lower grades under direction of a health officer, school physician or school nurse. In other words, we should have a distinct and scientific health program to reach every boy and girl in town with physical education including training as one of the leading features.

By keeping our school children strong and well, we shall not only prevent suffering and expense in their homes, but shall probably reduce the number of repeaters, a duty we owe to the children themselves.

By a new law, education is compulsory, with slight variations, through the first six grades. We have more than sixteen hundred pupils in those grades. Even if we promote ninety-five per cent. of these (a very good record), we shall still have eighty or more pupils taking at least, one extra year.

It costs us from thirty-five dollars to fifty dollars a year to educate one pupil; the expense entailed by such repeaters would be more than three thousand dollars a year, theoretically.

In practice, the monetary factor would not be as large as indicated, since the extra burden would be distributed over the entire town; but, whether expressed in dollars or in overcrowded school rooms, repeaters are expensive.

We are, therefore, not only justified in making a drive for a liberal health program but should be regarded as remiss in our duty to child and to town should we close our eyes to the great advantages accruing therefrom and remain content with present conditions.

Americanization

Here we have a problem which, although of less magnitude in Saugus than in many cities and towns, is, nevertheless, of sufficient importance to claim a share of our attention.

There is no doubt but that a very large part of the social and industrial unrest of this country is due to the fact that so large a percentage of the so-called foreign element has not, as yet, been taught what it means to be an *American Citizen*.

The more progressive employers are investing large sums to bring about a higher degree of intelligence and a more co-operative spirit on the part of their workmen.

They are realizing as never before that success is not secured by use of materials and machines alone, but that the human element is by far the biggest single factor and therefore should have the most careful consideration.

Aside from the economic and social benefits accruing from educating the immigrant, we feel that teaching the ideas and ideals of democracy is not only our patriotic duty, but should be hailed as a privilege, in that it supplements, vitalizes and makes more real that vision that led our boys across the Atlantic, into the trenches and on to victory.

As the Commonwealth pays one-half of the total expenditure for this work, there seems to be very little reason why it should not be carried on.

Continuation School

Some provision should be made to aid the few minors between fourteen and sixteen years of age who are now employed within the limits of the town, so that their education may be continued.

Not having two hundred of such minors, the town is not compelled to establish a continuation school although it *may* do so.

We have only about ten per cent. of the required number, but the educational welfare of that ten per cent. is worth considering. A night school might solve the problem.

The Housing Problem

Because of inadequate room in our Central Junior High, we opened three additional rooms in the Ballard building. This plan has worked out very well, although some lines of work are carried on with difficulty by the East Saugus members as the equipment for such work is found only at our central plant. In

winter it is not always pleasant to continue a program in two locations separated by a distance of one and a half miles or more. Loss of time and energy occasioned thereby can be afforded only by those who have more than ordinary physical and mental capacity.

The plan, therefore, should not be regarded as a permanent solution of the Junior High School housing problem.

Your Superintendent is not heartily in favor of one Junior High School in a town with population so scattered as is the case in Saugus, but it is far better than two or more unless each can have the accessories and equipment necessary for carrying forward all courses successfully. Plans should be made either to enlarge our present plant or to establish a similar one near the growing end of the town.

Relative to the Clifondale housing problem there is no need for a report here, as a special committee now has that in charge.

A Broader Educational Policy

These are days of reconstruction. Education is forging to the front. Teachers are coming into their own. Employers are coöperating as never before for a higher type of labor and citizenship, the American Legion and other national, state and local organizations are alive to the need and endeavoring to reduce it.

A bill now before Congress provides for the establishment of a National Department of Education with a cabinet member. Education then is being recognized as a distinct local, state and national issue.

Let us not forget our share in this forward educational movement, but rather take the broader view and put into active operation the means for bringing about health education with physical training, Americanization and other evening school work where needed.

These are not fads. We don't want any. But we do want the broadest educational program and the highest type of education.

If there are any leaks, let us stop them, but let us not forget to make constant use of every proper means of power whereby the educational machinery may be kept at top speed through its entirety, thus insuring as a product, the highest type of American citizenship.

Conservation of Fuel

We are doing what we can to reduce the fuel consumption.

With modern systems of heating and ventilating, there should be but little, if any need for open windows excepting where rooms are overcrowded. With fuel at present prices the cost of heating even a small additional number of cubic feet of air in each school room during the winter may easily run into hundreds of dollars.

We shall continue to make special effort along the line of fuel conservation.

TOTAL COST OF EDUCATION

Comparative Expenditure for Three Years

Other . . .	183 97	118 31	87 21
Other expenses . .	843 77	552 45	1,334 44

Cost of chimney extension at High School is not included.

Unpaid bills of previous years are not included.

Total for expenditure, \$78,996 19 \$89,288 55 \$130,021 37 .

In connection with the above comparison it is well to note that the amount received from the state through the income tax distribution for the school year, 1919, was \$14,320 or over \$4,000 more than the total increase in the regular school expenditure of 1919 over that of 1918.

The 1920 income tax distribution now due is, according to our records, \$21,168.75 or more than 50 per cent. of the entire increase in the regular school expenditure over that of 1919.

As we must appropriate the money and expend it before we can claim reimbursement from the State, the appropriation for schools is of necessity larger than the amount representing the town's net expenditure. In other words, the schools seem to cost the town more than is actually the case.

†New desks and seats for Ballard Junior High

Office Clerkship

This position was rendered vacant at the close of the fiscal year by the resignation of Miss Edith Pilling who has served us very faithfully and efficiently for several years. Miss Pilling was chosen as clerk in the office of the Water Board at a salary far beyond our reach.

We congratulate her new employers in that they need have no fear as to the continuation of a careful and efficient service.

Miss Helen Graves has been secured for the work in our office. She is taking it up carefully and bids fair to meet our need in a highly satisfactory manner.

High School

The fine spirit of co-operation together with a high grade of teaching now obtaining in Saugus High constitutes a source of pride and a hopeful outlook for those who have at heart the educational interests of the town's greatest asset—its boys and girls.

This school, made up as it is, from nearly every section and comprising nearly one third of the entire school membership of the town, presents an unusual opportunity for doing steady constructive work on a large scale.

But this can be carried on only through broad conceptions, liberal appropriations, mutual confidence and whole hearted coöperation.

All these can be secured, they *must* be secured, if we, as officials and citizens, are to do our full duty by those to whom we owe our best service.

For Special Consideration

The grounds should be beautified and proper approaches established.

A room with shower baths and lockers should be furnished in the basement for the athletic squad.

We should teach visualization either by means of a stereopticon or in some other manner. Eighty-seven per cent of what is learned is said to be gained through the eyes.

More laboratory equipment is needed so that broader courses in laboratory work may be established. We learn to do by doing.

The work of centralizing the heating plant should be extended as circumstances warrant, but, as our special heating engineer, Mr. Gibson, is submitting a report on this matter no further words are needed here. Your attention is respectfully called to Mr. Gibson's report, also that of the Principal, Mrs. Norris.

A Very Sad Loss

As we are nearing the close of our report (January 13) news is flashed to us of the death of Miss Dorothy Kirk one of our most successful and popular teachers in the Junior High. Miss Kirk accepted a position with us in September and in the few months that she had been with us, she not only proved her great value to the school, but secured the friendship and admiration of those with whom she came in contract.

Her loss to Saugus is, therefore, not only professional but personal.

Manual Training

We were very fortunate to retain our teachers for this line of work.

Efficient management and training stands out prominently, we also note special economy in the use of materials.

Your attention is respectfully called to the report of Director Corthell and Miss Lee.

Domestic Science

At the close of last year Miss Partridge, who had served with marked efficiency, decided not to return. This vacancy was not easily filled, but, finally, Miss Ida Walkey was prevailed upon to accept the position. Under her management the work has been carried forward steadily and efficiently. She is ably assisted by Miss Mildred Costello who teaches the sewing.

Miss Walkey is submitting a report to which your attention is respectfully called.

Supervisors

Last year we recommended a larger expenditure for supervisory work; as a result, we now have penmanship, music and drawing under direct supervision and a greater interest in these subjects is noticeable.

We need better equipment for carrying forward our plans for the work in music; and in drawing a more definite course of study.

Steps are being taken to supply these.

Recommendations

1. A more rigid enforcement of the truancy law.
2. A definite health program scientifically carried out.
3. Plans for continuing the schooling of minors between 14 and 16 years of age who work in Saugus.
4. A definite program for Americanization.
5. Much more attention to school grounds.
6. Sufficient appropriation by the town for support of athletics.
7. Plans for winter sports and gymnastic exercises.
8. Consistent support of a definite building program.

In General

A healthy growing interest is noticeable in all our schools. Teachers are giving of their very best; pupils in general are responding nobly.

Interest along some lines is especially strong, in penmanship particularly in which prizes have been offered by the Women's Civic League of Clifftondale and by a certain public spirited woman.

These prizes are offered for greatest improvement and for best penmanship, respectively, and the contest is open to grades 2, 3, 4, 5 and 6.

We are making a drive for better foundation work. While we do not discourage devices in teaching, we feel that much of the old time "everlasting and eternal drill" is necessary. Some people, in their horror of getting into a rut, wandered so far afield that they lose sight of the goal.

School conditions are favorable for good work and steady growth.

In closing I would express my appreciation for constant loyalty and coöperation on the part of the teachers, the cordial support of the Committee and for the marked degree of friendliness accorded me by the citizens of Saugus.

Respectfully submitted,

JESSE W. LAMBERT,

Superintendent of Schools.

SAUGUS, January 20, 1921.

Report of School Physician

Jesse W. Lambert, Superintendent of Schools:

DEAR SIR,—I respectfully submit the following annual report: I have visited all the schools assigned to me in this district, and have carefully examined all the children, and at various times during the year have examined them at my office when sent to me by the teachers. We have had no epidemics of contagious diseases in this section of the town, and the general health of the children has been exceptionally good.

I find quite a large number of cases of pediculosis and decayed teeth, especially in the lower grades. There seems to be no need of this if the parents would pay strict attention to the printed instructions furnished them by the teachers. In the cases of

decayed teeth, this can be remedied by a strict compliance with the rules of dental sanitation, preventing several serious diseases incident to decayed teeth. Examination reveals the following: Adenoids, 3; blindness, 1; conjunctivitis, 4; decayed teeth, 30; enlarged cervical glands, 5; heart disease, 2; impetigo, 9; mumps, 6; nasal catarrh, 4; pediculosis, 19; tonsillitis, 4; whooping cough, 9; ivy poisoning, 3; mental deficiency, 1; wear glasses, 11.

Very respectfully,

GEORGE W. GALE, M. D.

To the Superintendent of Schools, Saugus, Mass.:

I herein respectfully submit my annual report as School Physician.

I have carefully examined all the pupils at the Oaklandvale, North Saugus, Roby, and the Junior High Schools.

I have found 32 cases of adenoids and have recommended them for treatment, also 43 cases of diseased tonsils, 7 cases of pediculosis, 2 of scabies, 5 of impetigo contagiosa, 13 cases of impacted cerumen and 2,022 untreated carious teeth. I found 12 decayed teeth in one child and in several children from 7 to 10 carious teeth. In many cases I found small untreated abscesses (gum boils). I found 5 cases of running ears. The sanitary conditions are very good at all except the Oaklandvale School.

MYRON H. DAVIS.

Mr. Jesse W. Lambert, Superintendent of Schools, Saugus, Mass.:

DEAR SIR, — I respectfully submit my annual report for the year ending December 31, 1920.

As School Physician, I have carefully examined all pupils in the following schools: Armitage, Cliftondale, Felton, Lincoln and found 1 case of scabies, 26 cases of pediculosis, 68 impacted cerumen, 191 cases of decayed teeth, 60 cases of tonsils, 3 cases of adenoids.

We are very much in need of the services of a School Nurse and I would strongly recommend that one be employed during the coming year.

Respectfully yours,

LEROY C. FURBUSH, M. D.

Attendance Officer's Report

(Sept. 6, to Dec. 31, 1920)

To Jesse W. Lambert, Superintendent of Schools:

Have had 158 reports by card, 31 by telephone and 5 rush or chase cases. The latter generally means a long trail to a circus or fire.

Leniency or neglect on the part of the parents is a large factor in the child's absence from school. In too many cases the parents' ambition seems to be the earning capacity of the child against its fitness for life as an adult. In some cases when unable to secure the required working certificate, they have detained the children at some home industry, or obliged them to keep house while they themselves worked. In one case a boy of 13 was working while both the parents remained at home. In these cases the children were returned to school and the parents lectured as to their duty.

There are deplorable conditions where boys at the tender age, when play is so tempting, have not the home conditions to create the proper environment. Parents work while every evidence goes to show that the almighty dollar has more attraction than the care and culture of the child. Then there are large families, under-nourished, with sickness in their home a great part of the time, so that as soon as the oldest reaches the vital and interesting part of school life, he has to remain at home to help bear the burdens of the mother. There are some real cases of sickness, lack of proper footwear and long distances to travel in stormy weather.

One case has been brought into court and the child placed on probation.

I have found no instances where, in my opinion, the teacher has been at fault. The majority of cases are faulty parents. A backward child needs tuition at home instead of placing the blame on the teacher for lack of interest in that particular child. An interview with the teacher in such cases is highly beneficial.

Unfortunately there is no Continuation School in Saugus, so that a child between the ages of 14 and 16 armed with the proper working certificate and employed in Saugus has not the advantage of this training.

The duties of the truant officer, like all public duties, show us such extremes in human nature that the responsibility is all the more apparent. In order to bring the next generation into

their best we must meet these conditions and find means to improve, if not cure, them. It would seem that a lecture on attendance, its benefits and profits, would be a help in this direction as would a campaign for the education of parents on thrift and economy show that, for each dollar the child brings in, they are throwing away two by mismanagement.

Respectfully submitted,

CHARLES E. LIGHT,

Attendance Officer.

Report of Principal of High School

Mr. Superintendent:

At a crucial point in the nation's life, Lincoln remarked, "If we could first know where we are and whither we are tending, we could better judge what to do and how to do it." With this in mind, Mr. Superintendent, I shall try to show where Saugus High is, that its patrons may see the ultimate aims as well as the immediate needs.

Notwithstanding the fact that three rooms were opened for the Junior High at the Ballard school this fall, the membership of our Junior High was on January 1, 1921, 465, distributed as follows: VII, 185; VIII, 144; IX, 136.

In the Senior High, X, 84; XI, 65; XII, 76, with 3 post graduates—228.

The total enrollment of the school is 757, with representatives of 13 different nationalities.

The course of study in the Senior High remains much as last year, but in the Junior High technical music twice a week in each room of the VII and VIII grades has been added as well as scientific reading, for pupils need to be taught how to interpret the printed page intelligently; how to read silently and rapidly to get the content. Already the benefit is noticeable in other studies because of this reading.

(Note the course of study.)

In the State of Massachusetts, the average number of pupils in a high school class is 23; in our Junior High it is 37; this is far too large for the best results.

There are 18 home rooms and 23 recitation rooms with 32 teachers. There are three periods in the day when there is not a single room available, all are occupied.

Among the activities of the school may be mentioned the institution of a school bank in which from November to June, the deposits amounted to \$559.82.

The exhibit in May of Domestic Science, Manual Arts and Penmanship* reflected credit on instructors and pupils. These school exhibits are one means of informing parents and citizens of work of the school. It is to be hoped more will avail themselves of these opportunities to see the work of these departments.

Four fine pictures have been hung on the school walls: one, a steel engraving of Lincoln, was the gift of Miss Susie Hall, an alumna of the school; the others, from the proceeds of an art exhibit. The class of 1920 presented an oak settle for the assembly hall platform.

The military drill for the boys in May enabled them to make good in the line of march on Decoration day.

The physical condition of pupils is very important during school days; these boys and girls need to get *enough* sleep each night, at least nine hours; they need physical training in school, not the few in the various athletic squads but *all*; they need some out-of-doors play each day, and since many have no specific place at school or home for play, there is need of a playground. If the good people of Saugus want to honor the memory of the boys who served in the World War, it seems to me there could be no better nor more fitting memorial than a playground with a building on it for baths and lockers.

"Every child delinquent in body, education or character is a charge upon the community as a whole and a menace to the community itself. The children of sound physique, of sound education and character are the army with which we must march to progress."— *Herbert Hoover, October, 1920.*

Too long the individual differences of children have been neglected. There has been a struggle for uniformity of teaching, of discipline, of courses of study -- a struggle to meet the needs of the average child but such a child does not exist. All children are different in capacity, in interests, in power of application, in the outcomes of effort. There are two main causes of the elimination of pupils from school—one, the economic pressure of the times; the other, the failure to find the course of study which best suits the capacity and interests of the child. This latter one, may be remedied by smaller classes and a more varied list of studies made vital as presented to the pupils. This would require more skillful teaching. As the work of the Manual

Training department appeals to so many of our pupils, may I suggest that it would save time and energy if the building could be placed on the High School grounds. At least 15 minutes is lost in transit and more might avail themselves of this line of work if the building were nearer.

Teachers and schools are often criticised for their failure to work what would be nothing less than miracles. The equipment of the school is above the average; its teaching force is professionally trained, alert and in earnest; yet, complaint has come that Saugus High does not fit for college. All that the teacher can do is to develop and strengthen the powers within the pupils; the teachers cannot create these powers for the child; the trouble is, that the pupils do not fit themselves; their interest is but half-hearted. The class of 1919 had twenty-four members, three of these went to college directly from high school and two were honor pupils in their first year's college work. From the class of 1920, six of the sixty-nine went directly to college, while seven went into one business office in Boston and every one is "making good."

During my administration, I have had in mind three main objectives; to maintain good discipline by winning the confidence of the pupils; to instill habits of punctuality and regularity; to encourage habits of honest work and study. The pupils, for the main part, seem to want to do the right thing in school; the number on the tardy and absent list is constantly decreasing; the pupils study well in school but there is not enough home study, and here I plead for the co-operation of the parents, that they see that their children have a time and place for at least two hours of home study a day. Study involves thought; it is not enough to read the lesson over or get the answer, any more than it satisfies the hunger just to sit down to a table. It is not enough to just pass; it is not enough to do a bit; the pupil must get the habit of doing his *best*.

"Schools are the price we pay for being a great, prosperous and free nation. Without them, we would be a Russia or a Mexico."

"It is good to know; it is better to do; it is best to be." This quotation seems to embody the entire scope of education in its relation to human conduct. The end toward which we work is our chief concern. The characters of these children twenty years hence—that's the end to be achieved.

Respectfully submitted,

(MRS.) LUCIE M. NORRIS, *Principal*.

Choice of Studies :

In making up a program of work for any year, pupils may choose studies from the list of that year, or from the list of any preceding year, as the arrangement of the daily program for the school will permit. No pupil will be permitted to take studies

which conflict with each other, or with the daily program of the school. No pupil will be permitted to take a study for which his previous studies have not prepared him. A language once begun should be continued at least two years, and a longer time is advisable. No change of studies will be allowed during the year except for urgent reasons, and then only by permission of the principal. The selection of all studies shall be subject to the approval of the principal.

The Classical Course requires four years of Latin. The branches named in each course must be pursued by all pupils taking that course. No student will be enrolled as a Senior if he lacks more than one credit at the opening of school. Not less than three nor more than five major subjects can be carried by any student, unless by special permission of the principal and superintendent.

Passing Mark and Promotion :

To receive the diploma credits given for any study, a pupil must maintain in that study an average of at least C on the year's work.

College Certificates :

College certificates will be given only for those studies in which a pupil gets at least an average of B.

Diplomas :

To receive a diploma of graduation, a pupil must gain at least sixteen diploma credits, according to one of the prescribed courses.

Eligibility :

To represent the school in any athletic or inter-school event, or to hold any office in class or school, a pupil must maintain an average of not less than C in every study in his program and be satisfactory in conduct.

Co-operation of Parents :

To succeed in their school work, High School pupils must do much of their studying at home. Not less than two hours a day should be given to this home study. Parents should see that the pupils observe these hours regularly, and free from interruptions. Parents are urged to visit the school frequently and keep in close touch with its work.

Figures at bottom of subjects indicate the number of recitations per week.

All students will be required to take part in rhetoricals or physical culture at discretion of the principal.

Report of the East Saugus Junior High School Principal

Mr. J. W. Lambert, Superintendent of Schools, Saugus, Mass. :

DEAR SIR,—A brief report of the Ballard Junior High School, East Saugus, is herewith appended.

Although to some degree experimental as must reasonably be expected, there is indication that the work of this school has been growing in scope, and that this gain has been steady and constant.

With the opening of the fall term and the organization of Junior High classes, departmental work was immediately established, with a course of study as intensive as time would permit. In all classes special stress has been laid upon English and training for citizenship, with mathematics, geography and history as major subjects. In addition each class has had two or three weekly periods in music with some ensemble and much chorus work, drawing, penmanship and physiology. The use and importance of daily current events as relate to the progress of the world has been emphasized in all classes, and in all of the grades manual training and domestic science have been pursued, these subjects though optional, being liberally attended, although the distance from the centres of instruction has prevented others who had inclination toward the subjects from attending the classes.

In the Eighth grade, the study of geography has been maintained in addition to civics, as it was believed the class needed a better understanding of this vitally important subject.

In all classes, pupil participation has been one of the chief aims in view, and through this socialized recitation it is apparent that pupils are learning to think out the problems confronting them instead of relying entirely upon their teachers or some bright member of the class.

As must necessarily be expected in an industrial town, or one in close proximity to manufacturing centres, the work of many pupils has been seriously impaired by frequent changes of residence, as only by close and continuous application can the desired results be obtained.

Early in September, Monday morning assembly in the upper hall was inaugurated, this occasion affording one opportunity during the week when the entire pupil body is gathered together. Scripture readings, usually some appropriate Psalm, the repeti-

tion of the Lord's Prayer, the pledge to the flag, and patriotic music feature each of these gatherings. During the holidays, music appropriate to the Christmas season was included in the program.

Believing that every child should have adequate training in the duties, obligations and rights of citizenship and that the development of character and the teaching of correct moral principles are essential to such citizenship, considerable time has been devoted to this instruction throughout the school curriculum.

A vital need for greater care of school property, sanitation, thrift, and economy, and more regard for the rights of others is apparent, and every effort to compel each pupil to realize his obligation to the community is being made, that the boys and girls of to-day may effectually and intelligently fulfil their roles as citizens of the future.

During the year enrollment has varied but little, but indications would lead one to believe that the school will be materially larger by another year.

By the presentation of "Mayflower Town" in which each class participated, the Pilgrim Ter Centenary was appropriately observed in December. The school also had a part in the Junior Red Cross Drive, and has endeavored to keep abreast of the thrift and other movements from time to time.

I desire to acknowledge the generous co-operation of the Superintendent of Schools whose counsel has been most valuable, members of the board, the special supervisors who have always shown a willingness to conform to each and every request or suggestion made, and of the faculty of the school with which I am daily in contact.

Respectfully submitted,

HARRY ALDEN JOHNSON,

Principal.

Report on Household Arts Department

To Mrs. Lucie Norris, Principal of Saugus High School:

The work of Household Arts Department for the year 1920-1921 commenced September 6.

The enrollment is as follows:

Elementary Sewing, Grade VII-VIII, 222; Cookery, Grade IX-X, 52; Dressmaking, Grade XI, 17; Household Management, Grade XII, 12.

The lunch room is carried on entirely by the classes in cookery.

Two aims are constantly kept in mind.

1. To supply nutritious food at the least possible cost.
2. To cover thoroughly a well defined course of study in the theory of cookery, and to make every laboratory lesson illustrate the lesson taught.

We believe in teaching our girls the "why" as well as the "how," and in developing a sense of responsibility.

The first month of school was devoted to canning and jelly making and the products are now being used in the lunch room.

Sample menus are:

1. Cocoa—Milk, .05; Tomato bisque, .05; Minced ham sandwich, .03; Date and raisin sandwich, .03; Chocolate blanc mange, .05.

2. Cocoa—Milk, .05; Shepherd pie, .05; Celery salad sandwich, .03; Peanut butter sandwich, .03; Baked custard, .05.

So far, the department has just cleared expenses.

Receipts October 14 to January 1, \$440.18.

This report is followed by that of Miss Costello who has charge of the sewing and dressmaking.

We extend our appreciation to Mrs. John H. Parker for the new vitrole table tops which have so improved the appearance of our vitriolite laboratory.

Respectfully submitted,

IDA B. WALKEY.

Sewing Department

Sewing is presented from the theoretical as well as the practical standpoint. Throughout the course, the study of textiles and the practice of patching and darning are taught.

The fundamental stitches and their applications, also simple embroidery stitches are taught in the seventh grade. The articles made by hand in this grade include pin cushion, bag, underwear and a simple dress. In the eighth grade the stitches are reviewed, the use of the sewing machine is taught, and crocheting is introduced. The garments made in this grade are cooking uniform, collar and cuff set, underwear, middy blouse and dress.

The course in dressmaking includes drafting, the choice and

interpretation of commercial patterns, also the planning, cutting, fitting and finishing of the garment. That we may better understand the conditions affecting the prices of textiles, current events have become a part of the required course in dressmaking.

Respectfully submitted,

MILDRED S. COSTELLO.

Report on Manual Training.

J. W. Lambert, Superintendent of Saugus Schools:

The Manual Training department opened with a total enrollment of 313 pupils; comprising not only the boys from the High School building, but also the three classes from the Ballard School.

The younger classes, namely those who have had no Manual Training at all began with the smaller models, such as the pencil holder, broom holders, plant stands and other models that required careful work; and which embraced many exercises and yet did not use up an exorbitant amount of wood. Later as they became more proficient, various other models were given which were more difficult to make such as the bread boards, glove and handkerchief boxes. In this way the pupil gradually worked on until he reached the stage where he began to think about the construction of costumers, mahogany trays, medicine cabinets, tables, lamps, boats, and numerous other projects.

The time allotted each class for the study of Manual Arts is of necessity short because the classes are numerous, and the crowded conditions make it almost impossible to become thoroughly acquainted with each individuals work.

Aside from the regular class work much repair work has been done through the efficiency and co-operation of the Manual Training Department. Early in the year, sixteen footstools were made for the school at North Saugus; a sand table was constructed for one of the Grammar schools, many of the desks and chairs from the Roby School scraped and refinished; a screen built for the Ballard School; a cupboard was built in the High School for the Chemistry room, the tables for the Domestic Science Department fixed and vitriolite placed on the top; old shadow boxes that were of little value as they were, were made over into excellent drawing boards for the Drawing Studio. A task that was rather difficult, yet when completed added much

to the attractiveness of the assembly hall was the placing of several yards of burlap on the wall of the assembly hall back of the platform, to cover the disfigurements caused by the paint cracking and scaling. Cupboards were also constructed in the Manual Training room so that every boy might have a locker for his work.

All of the lumber used in Manual Training is resawed; i. e. thick stock is purchased and then sawed in halves. Of course this necessitates a great deal of extra work for the teacher, but incidentally it reduces the cost of stock.

We are always grateful for any additions to the Manual Training rooms, and are glad to note the additions of two fire extinguishers. Now we would appreciate the installations of a machinists lathe and upright drill. This not only would act as an incentive in machine shop work, but would help on work to repair. Another thing which is absolutely necessary, is a new flight of front steps for the building. Constant use by hundreds of boys combined with the elements has entirely worn out the old steps. Neglect of this important duty may endanger the limbs of many people.

Manual Training perhaps more than any other subject trains all the faculties of the child; physical, mental, moral. It tries to avoid all positions and movements not conducive to health. Mentally it produces a more thoughtful, more self-reliant, more accurate and alert mind. Both the method of its teaching and the motive which inspires the making of something worth while tend to do this. Every model is calculated to arouse and sustain interest because there is an attractive and worthy end in view which the boy hopes to reach and can reach only by his own personal effort. That is what we are aiming for. To accomplish all these things it is important that the teacher use a great deal of tact. Especially in Manual Training it is very important that he possess that quick insight and ready sympathy that discerns difficulties before they arise; he must recognize honest effort even though good visible results are not always in evidence. His personal interest in each boy promotes a spirit of cheerfulness and goodwill.

Respectfully submitted,

N. B. CORTHELL, *Director.*

ELEANOR W. LEE.

Report of Supervisor of Music

Superintendent J. W. Lambert:

I herewith submit my first report as Music Supervisor in the public schools of Saugus.

There was a time when music was considered a luxury rather than a necessity in the school curriculum. Then people began to realize that the child's musical training did not stop when he left school but was continued in his community. This advanced training came in the form of choir, orchestra and choral society. In order that the child might benefit from his early training it was necessary to follow a schedule in the schools. At first the outlines covered all the grades from the primary through high school. Authorities discovered that a large per cent. of children stopped their school life at the end of the grammar grades. For this reason the mechanics of music have been put in the lower grades, thus allowing time for song singing and appreciation of music in the higher.

This year has been spent thus far on mechanical work in the first six grades.

In the primary grades a large number of rote songs has been taught. Special stress has been laid upon tone production and sight reading. In connection with the last mentioned subject I wish to say the children assume all responsibility. If a mistake is made by one child, another pupil corrects. The teacher assists only as a last resort. As Mr. T. P. Giddings of Minneapolis says, "Teach if cornered, otherwise let the children learn."

At Christmas time an assembly was held in each building for the purpose of singing carols. Three carols were memorized. Next year these will be reviewed and one new one learned.

Teachers and pupils have been handicapped by lack of material. In music, as in reading, there should be several text books, for reference and variety. The one text book in the schools was in such condition as to be almost of no use. This has been partly remedied by the purchase of new material for the third, fifth and sixth grades.

The second and fourth grades are still to be equipped, the second grade is at present making use of an old text book with very fine print. Like the primers in reading, so in music should these first books be in large print and very little on the page.

In the Ballard Junior High the work has been wholly chorus

singing. The voices are being graded in order to start Glee Club work in a short time.

The able assistance of the grade teachers and the enthusiasm of the pupils has made progress rapid and smooth.

Respectfully yours,

LAURA E. CRAM.

Report of Supervisor of Penmanship

SAUGUS, MASS., January 17, 1921.

To Mr. J. W. Lambert, Superintendent of Schools:

The Palmer Method of writing has been established in all the grades.

This method when mastered enables the pupils to write legibly, rapidly and easily. Pupils are able to write for a considerable length of time without any strain.

Good writing is always in demand and it is our aim to send good writers from our schools.

Good writing is based on good position and muscular movement. Under the Palmer method the pupils keep healthful posture, straight spinal columns, expanded lungs, and there is no eye strain.

The foundations are laid in the first grade. The children are taught to roll the arms on the muscles. Ovals and simple drills for letters and words are practiced. Constant repetition of these drills gives the child perfect control of the muscle. Then muscular movement writing becomes a habit. The work of each grade is closely connected with that of the preceding grade.

We have only had four months of the work. Much time has been devoted to breaking habits already formed.

At the end of the school year there should be a great improvement in the writing. It can be seen now in many cases.

The Women's Civic League of Cliftondale has offered prizes for writing. These prizes are to be given at the end of the school year. This is a great incentive for the pupils.

I appreciate the efforts of the Civic League to stimulate the interest among the children.

Weekly visits are made to all schools. The territory is large and sometimes difficult to cover. The splendid spirit shown by teachers and pupils has made every visit pleasant and any difficulties encountered seem trifles.

The pupils are deeply interested in the work and the time allotted for each class passes too quickly.

I wish to thank you, Mr. Lambert, and the teachers for hearty co-operation in the work.

Respectfully submitted,

KATHERINE A. FALVEY,

Supervisor of Penmanship.

Report of Supervisor of Drawing

Mr. Lambert, Superintendent of Public Schools, Saugus, Mass.:

DEAR MR. LAMBERT, — Assuming office as supervisor of drawing of the public schools of Saugus in September, 1920, my aim in the drawing and manual arts in the schools is to develop visual discriminations, memory and imagination, together with an ability to develop the power of drawing freely and fluently what they know or ought to know of nature and life. In this work, as in all educational work, the pupils are made to think clearly and express themselves well.

In this particular course the thinking must be in terms of vision, light, color, positions, directions, distances or measures, proportions and shapes.

The knowledge and ideas to be expressed by drawing and coloring are in tone relations, and in space relations. The terms of expression are in lines of spots color. The aim is to induce the pupil to think of nature and life, in lines and spots of color, and put these lines and spots on paper, just as in other courses of study they think in words and forms of language, using the words in speech and in writing. The knowledge and ideas which are developed and expressed in drawing, are hardly less important than those which are expressed by language. Many ideas which we try to express in speech and by writing can be much better expressed. more definitely and more clearly by drawing and painting.

The aim in manual training which in the drawing department is designated as book binding and logically follows the work in card board construction, is of an elementary character, developing individual initiative, and the ability to plan and to complete simple constructive work.

Respectfully submitted,

JOSEPHINE F. MALONE,

Supervisor of Drawing.

Margaret Cole	Bridgewater Normal	Arith., Algebra	1919	800
Katherine Falvey	Bridgewater Normal	Penmanship	1918	900
Eugenia McCann	Gorham Normal	English	1919	800
Edna Miller	Gorham Normal	U. S. Hist. Gr. 8	1919	850
Katherine Moynihan	Salem Normal	English	1914	950
Annie E. Nash	Gorham Normal	Arith. Gr. 7	1915	900
Elizabeth Nelson	Castine Normal	Arith. Gr. 8	1913	950
Helen Penny	Salem Normal	Geography	1919	800
A. Louise Stetson	Gorham Normal	Englise	1915	950
Mabel Willey	Salem Normal	Arith., Geog.	1918	850

Roby School

Florence Martin	Salem Normal School	Prin. Grade 6	1918	900
Elizabeth Sheridan	Bridgewater Normal	Grade 5	1917	750
Helen Gilroy	Plattsburg Normal	Grade 3-4	1919	750
Sarah J. Dyer	Salem Normal	Grade 5-6	1916	750

* Teachers in both Junior and Senior High School.

Margaret McDermott	Derby Academy	Grade 6	1919	750
Charlotte Seymour	Salem Normal	Grade 3	1919	650
Ruth Littlefield	Salem Normal	Grade 1-2	1919	650
Julia J. Nourse	Keene Normal School	Grade 1	1917	750

Felton School

Maria E. Smith	Castine Normal	Prin. Grade 6	1892	1050
Marion Fullerton	Salem Normal	Grade 5	1917	750
Elizabeth B. Taylor	Lafayette Tr. Sch.	Grade 4	1914	900
Jennie E. Dunn	Frederickton Normal	Grade 3	1916	800
Nellie Sullivan	Bangor Train. School	Grade 2	1920	900
Catherine Callahan	Salem Normal	Grade 1	1916	800

Lincoln School

Emma B. Hughes	N. J. State Nor. Sch.	Prin. Grade 6	1914	875
Pearl M. Peterson	Salem Normal Sch.	Grade 6	1919	650
Gertrude Chapman	Salem Normal Sch.	Grade 5	1912	900

Cliffondale School

Lilla G. Quint	Saugus High School	Prin. Grade 4	1898	1000
Myra W. Beckman	Framingham Nor.	Grade 3	1915	900
Helen Chesley	Salem Normal	Grade 2	1918	700
Clara Trowbridge	Melrose High	Grade 1	1892	900

Armitage School

Irene F. Thompson	Salem Normal	Grades 3-4	1905	950
Jeanette Nicholson	Bucksport Seminary	Grades 1-2	1911	900

Ballard School

Evelyn A. Stevens	Plymouth Normal	Prin. Grade 6	1914	1000
Clara D. Ferris	Fitchburg Normal	Grade 5	1914	900
Mittie J. Smith	Plymouth Normal	Grade 6	1919	750
Sadie Baldwin	Salem Normal	Grade 5	1919	750

Mansfield School

Alice L. Seaver	Windsor High Sch.	Prin. Grade 4	1911	1000
Mildred Willard	Neil's Kindergarten	Grade 3	1917	750
Marah G. Stebbins	Symond's Kinderg'rtn	Grade 2	1907	900
Elsie Wilson	Franklin Academy	Grade 1	1919	750

Emerson School

Pauline R. Peckham	Dean Academy	Prin. Grade 4	1908	1000
Mildred I. Flockton	Perry Normal Sch.	Grade 3	1917	750
A. Mae Glidden	Plymouth Normal	Grade 2	1919	750
Enid F. Waring	Framingham Normal	Grade 1	1919	700

North Saugus School

Eva M. Straw	Limerick Academy	Prin. Gr. 5-6	1919	875
Rozella Fairchild	Salem Normal	Grades 3-4	1919	700
Florence L. Craig	Salem Normal	Grades 1-2	1918	750

Lynnhurst School

Rilla Kellam	Wheelock School	Grades 1-2-3	1919	650
Josephine Powers	Gorham Normal Sch.	Grades 4-5-6	1919	750

Oaklandvale School

Margaret Cameron	Salem Normal School	Grades 1-4	1918	800
------------------	---------------------	------------	------	-----

Supervisors

Alice M. Partridge	Framingham Nor. Sch.	Domestic Sc.	1917	1000
Martha Beckwith	Swampscott High	Domestic Sc.	1919	700
N. B. Corthell	Castine Normal			
	Boston Sloyd Sch.	Manual Tr.	1917	1600
Eleanor W. Lee	Boston Nor. Arts Sch.	Manual Tr.	1917	1200
Rena Wiggin	Mass. Nor. Arts Sch.	Drawing, High	1919	900
Mary J. Ruth	Boston University	Music	1919	800

School Janitors, January, 1920

Alfred C. Lynn	High School	1916	1200
Millard F. Verrill	High School	1917	900
James A. Marshall	Roby, Old and Manual Training Bldg.	1909	900
George W. Atkinson	Lincoln, Emerson and Cliftdale	1916	1050
C. C. Merrithew	Felton School	1902	750
Charles B. Rhodes	Ballard and Mansfield	1911	900
Charles E. Richardson	Armitage	1916	170
George A. Porter	North Saugus	1911	255
James Church	Lynnhurst	1919	170
Emma E. Walton	Oaklandvale	1919	104

School Physicians

Dr. Myron H. Davis	Precinct 1	1918	100
Dr. Leroy C. Furbish	Precinct 2	1919	100
Dr. George W. Gale	Precinct 3	1908	100

Attendance Officers

W. Charles Sellick	1919	75
George W. Atkinson	1919	75
